### Course Description:

Experience the fully digital implant workflow firsthand. From guide design to final restoration, this course exposes the general practitioner to highly accurate, predictable and minimally invasive implant dentistry. Find out how seamless integration of chairside digital technologies and CBCT creates the ultimate tooth replacement experience for your patients.

### Course Objectives:

Upon completion of this program participants will understand:

- Diagnostic advantages of CBCT scanning
- How to integrate chairside digital technologies with implant planning and guided surgery
- The latest advancements in restorative digital workflows, including a direct pathway to order patient-specific abutments chairside
- How to obtain optimal esthetic results in fewer patient visits, as well as eliminate the complexity associated with traditional implant solutions

### Featured speaker

Dr. Sarah Jockin is a champion of digital dentistry and can't imagine treating her patients without it. Practicing CBCT integrated implantology since 2011, she values having full control over her patient's dental implant experience. Dr. Jockin is Associate Clinical Professor at UF Gainesville, where she teaches CAD/CAM digital workflows to Graduate Prosthetics

Residents. She inspires, educates and supports digital dentists nationwide as the director of CERECseminars.com, a digital training facility in Tampa FL. Dr Jockin is a Diplomate of the American Board of Oral Implantology, associate Fellow of the American Academy of Implant Dentistry and speaker for Dentsply Sirona, lecturing on crown down implantology. During her free time, Dr. Jockin enjoys going scuba diving and snowboarding with her husband Jay and son Victor.

Speaker Disclosure: Speaker is being compensated by Dentsply Sirona for this event, but does not have monetary or other interest(s) with Dentsply Sirona or any other company whose products are discussed or presented in presentation.
